

MARKISOLETTE

MT74

A stable awning that is suitable for buildings with high windows – ranging from shops and offices to hospitals and schools. The fabric runs vertically along the upper part of the window until it extends out like an ordinary awning. This provides very good protection against the sun, while providing a clear view through the window. There are several versions of the fabric available, such as light-resistant, weather-resistant and see-through.

MT74 cassette

MT74 front profile

DIMENSIONS (m)	MT74
Max height	3,0
Max width	3,0
Series connection with motor	6,0

Operation

MT74 is operated with an exterior crank. Optionally, operation can be made with motor. The motor can be supplemented by automation, ie remote control or sun and wind automation.

Mounting

The awning can easily be mounted directly into the window-sills, on the wall or under the roof.

Awning fabric

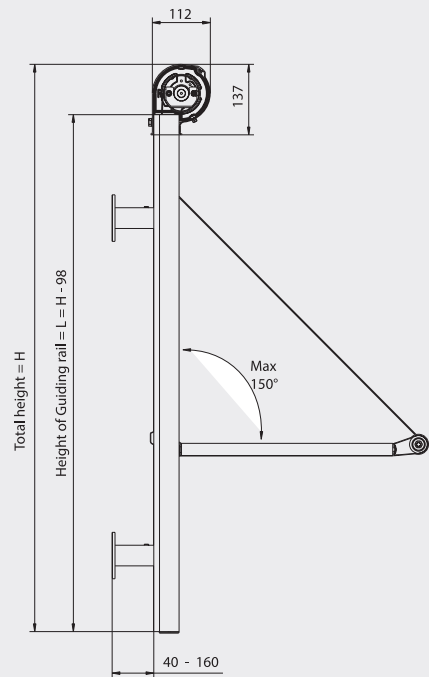

There is a large range of fabrics to chose from: Acrylic (very good light and weatherability), and Screen (transparent PVC-coated glassfiber that filtrates sunlight.)

Awning fabric

The screen collection contains fabrics with flame retardant qualities and is certified according to Öko-tex and Enduris.

Awning hardware

MT74 comes in white and grey as standard. With longer delivery time, any RAL colour is available.
